PROFESSIONAL SUMMARY

Fullstack Software Engineer with **4+ years of experience** building scalable, production-ready SaaS and enterprise applications using Angular and NestJS. Specialized in microservices architecture, real-time systems, and fullstack development, with proven experience delivering complex platforms including marketplaces, management systems, and AI-integrated applications.

Demonstrated ability to lead technical design, develop end-to-end solutions, and collaborate in remote Agile teams, with a strong focus on scalability, performance, and clean architecture.

PROFESSIONAL EXPERIENCE

Software Engineer - Dhahri AlKubaisi Technologies
September 2024 – Present | Qatar, Remote from Tunisia

Darb : Tender Management System Project

- Developed scalable Angular interfaces with multi-role access (admin, bidders, reviewers)
- Built responsive UI using Tailwind CSS and NG-ZORRO with consistent cross-browser experience
- Implemented secure authentication flows using JWT and role-based access control
- Integrated RESTful APIs for bid submission, offer management, and user workflows
- Contributed to CI/CD pipelines (GitLab), improving deployment reliability
- Collaborated in Agile environment and participated in code reviews to maintain code quality

Technologies: Angular, Tailwind CSS, NG-ZORRO, TypeScript, JWT, Docker, GitLab CI/CD

Padel App : Booking & AI Tracking Platform *(Backend Developer)*

- Designed and implemented microservices architecture using NestJS for scalability
- Built backend services for booking, payments, scheduling, and user management
- Integrated AI-based detection (Python + Roboflow) for real-time player and ball tracking
- Developed REST APIs enabling seamless communication between frontend and AI modules
- Ensured high system performance and modular backend design

Technologies: NestJS, Microservices, Python, Roboflow, REST API

INOVALYA : Project Management Platform *(Tech Lead)*

- Led system architecture and fullstack development of a Trello-like SaaS platform
- Designed scalable backend using NestJS and Docker
- Implemented task assignment system based on skills and availability
- Defined API structure and ensured maintainable code architecture
- Conducted code reviews, mentoring, and technical decision-making

Technologies: Angular, NestJS, TypeScript, REST API, Docker

Qartis : Freelance Marketplace Platform *(Fullstack Developer)*

- Built fullstack platform with Angular + NestJS
- Developed key features (Project listings, Messaging system, Contracts and user evaluations)
- Designed scalable RESTful APIs
- Built role-based dashboards (admin/client)
- Participated in product decisions and deployment workflows (Docker)

Technologies: Angular, NestJS, TypeScript, RESTful API, Docker

Qode : White-Label SaaS Platform *(Fullstack Developer)*

- Transformed marketplace into multi-tenant white-label SaaS solution
- Implemented client-specific customization and branding system
- Refactored backend and frontend for modularity and scalability
- Enabled flexible configuration for different business use cases

Technologies: Angular, NestJS, RESTful API

Software Engineer – Barcha technology
February 2022 – August 2024 | Tunisia

Yellow Park : Smart Parking Platform (Frontend)

- Developed real-time Angular application with WebSocket integration
- Enabled live tracking of parking availability and vehicle activity
- Built responsive and modular UI components
- Collaborated in distributed Agile team

Technologies: Angular, TypeScript, WebSocket, Docker, GitHub

Barsha Food : Food Ordering Platform (Fullstack)

- Built fullstack application using Angular and NestJS
- Developed REST APIs for orders, users, and delivery tracking
- Implemented cart, checkout, and real-time order updates
- Deployed using Docker and CI/CD workflows

Technologies: NestJS, Angular, TypeScript, Docker, GitHub

Barsha E-Commerce : Multi-Vendor Platform (Fullstack)

- Developed multi-vendor e-commerce platform
- Integrated Stripe for secure payments
- Built vendor dashboards and order management system
- Ensured scalable and modular architecture

Technologies: NestJS, Angular, TypeScript, Docker, Stripe, GitHub

Fullstack developer : Solinum Consulting
September 2021 – January 2022 | Paris, France

ERP & HR Management System – Internship Project

- Designed and developed a full-stack enterprise resource planning (ERP) and human resources management system from scratch.
- Conducted database analysis and schema design to support modules such as employee management, attendance, payroll, and reporting.
- Implemented core business logic using Java Spring Boot and developed user interfaces with Angular for responsive, user-friendly experiences.
- Performed comprehensive testing and debugging to ensure system reliability, scalability, and maintainability

Technologies: Java Spring Boot, Angular

TECHNICAL SKILLS

Frontend Development : Angular, TypeScript, RxJS, Tailwind CSS, NG-ZORRO
Backend Development : NestJS, Node.js, RESTful APIs, Microservices Architecture
Programming Languages : TypeScript, JavaScript, Python, Java, HTML5, CSS3
Databases : PostgreSQL, MongoDB, MySQL
Real-Time & Advanced Systems : WebSocket, AI Integration (Python, Roboflow)
DevOps & Deployment : Docker, Docker Compose, GitLab CI/CD, GitHub Actions
Authentication & Security : JWT Authentication, Role-Based Access Control (RBAC)
Architecture & System Design : Scalable Systems, Microservices Architecture, Clean Architecture, SaaS Platforms
Tools & Collaboration : Git, GitHub, GitLab, Jira, Confluence, Postman, Swagger, Figma
Testing & Code Quality : Jest, ESLint, Prettier, SonarQube
Methodologies : Agile (Scrum / Kanban)
